Work Experience

Frontend Developer   January 2023 - Today

ETA+ GmbH   Hamburg | Remote

- Developed standalone Angular components, integrated forms, input fields, dropdowns, buttons, and tables, utilizing PrimeNG to enhance the user interface.
- Collaborated with UX/UI designers to modernize Angular components to match new design standards per Figma specifications.
- Implemented Angular components using Storybook for indexing and documenting UI components and their various states, ensuring easy access and reuse by the team.
- Conducted component tests and end-to-end (E2E) tests using Cypress to ensure code functionality and quality.
- Implemented APIs for real-time data fetching and server communication.
- Successfully migrated AngularJS components to Angular 16+ by creating a presentational component, interfaces, services, component and e2e tests, along with a shell component.

Frontend Developer   December 2020 - July 2022

Crypto Money Invest d.o.o.   Belgrade, Serbia

- Developed websites and web applications by transforming Figma design mockups into fully functional products.
- Improved website usability, visual appeal, and responsiveness through redesign efforts.
- Designed and implemented a front-end architecture for an email service using Spring Boot.
- Collaborated in the development of 3 MySQL databases, enhancing data retrieval and analysis efficiency.
- Ensured that WordPress websites were kept secure and up-to-date by performing regular maintenance and updates.
- Optimized SEO for 5+ websites, resulting in a 20% increase in traffic and higher Google rankings.
